

CABBANI[®]
custom made parquet

This Brochure will take you into the world of Cabbani. This is a world where wood plays the leading role. Discover why nothing beats the charm and character of a wooden floor. Indeed, parquet is timeless while being more relevant than ever before.

But because even the best photos sometimes fall short, we would like to invite you to a Cabbani distribution point to see and feel our parquet for real and to breathe in the aroma of the wood.

With this brochure, we hope to inspire you in your search for a durable floor with timeless beauty.

Introduction 04-05

A sustainable choice 06-07

Inspiration 08-49

The collection 50-57

Finishing & Maintenance 58-61

Technical table 62-63

MADE IN FRANCE WITH LOVE

Thirty-nine years ago, Gérard Cabannes gave shape to his dream. He began a veneer processing company surrounded by the inspiring vineyards of the Bordeaux region. He constantly built on his successes and with the second generation, Benoit and Julien Cabannes, this led to the production of laminated parquet in 2000.

Their brainchild, the parquet system à la carte, with which the customer can assemble a wooden floor as desired, turned out to be another bull's eye. Quality and flexibility took the company to the top of the upmarket wooden flooring segment in no time.

After a professional relationship for over 25 years, and in view of the complementarity of the production sites on both sides, Benoit and Julien decided to make the partnership more permanent and their company was integrated into the Decospan group. New opportunities arose. Since January 2016 their parquet has been available in specialised parquet shops under the CABBANI name. Under this brand name, we continue to invest in the production of this high quality custom French parquet to serve customers worldwide.

A SUSTAINABLE CHOICE

Decospan gives respect for nature a central place in its policy. This belief was embodied in the Pure Wood Charter. Suppliers are asked to sign and adhere to this charter. It gives a clear signal to both customers and suppliers that engagement in preserving nature is an important part of our strategy.

OXYGEN FOR THE ENVIRONMENT

Trees and forests are the green lungs of our planet. They take up CO₂ from the atmosphere and produce oxygen in the process. Relative to other building materials, wood can lead to a significant reduction of the amount of carbon dioxide. Every cubic metre of wood is equal to 2 tons less CO₂ in the atmosphere.

CARE FOR THE FUTURE

Wood is a sustainable and optimally recyclable resource. At the end of its lifecycle, it is perfect to reuse in new products and applications. In this way, a large volume of carbon is stored in the wood for a long time. Reusing wood also means that no other, often non-renewable, materials need to be used.

ATTENTION FOR FORESTRY

Responsible forest management with replanting and controlled felling maintains the total amount of trees and forests. This prevents this valuable resource from being exhausted prematurely and keeps our environment in balance. With this and other measures, we can confidently say that choosing wood means choosing the future while promoting a sustainable economy.

HEALTHY INTERIOR CLIMATE

In the meantime, a Cabbani parquet floor improves the air quality in your home. Indeed, all our efforts during the production process focus on making your house into a healthy home. We achieve this by only using harmless water stains and adhesives that are free of volatile organic compounds (VOCs). Our lacquers also contain a minimum of harmful solvents. This gave us an A+ label, which stands for the best residential air quality. Our products also meet all of the necessary qualifications to be certified FloorScore® conforms to the CDPH/EHLB Standard Method v1.2-2017 (California Section 01350), for the school classroom and private office parameters when modeled as Flooring.

PEFC™ stands out by taking into account the specific characteristics and legislation of every country. PEFC™ aims to prove that it is possible to combine forest conservation with rising consumer demand for wood.

Available on request for projects from 500 m².

FSC® is an international, independent, non-governmental non-profit organisation. It was established by forest owners, the wood sector, social movements and environmental organisations. FSC® promotes responsible forest management all over the world.

Available on request for projects from 500 m².

COLLECTION 01

Compose your own dream parquet

Cabbani stands out for its unique 'à la carte system'. By playing with and varying a number of parameters, the end result is guaranteed to meet all your requirements and expectation.

Easily design your personal wooden floor by choosing from 4 collections, 24 individual colours, 8 board dimensions, 4 different top layer thicknesses, 2 types of cores, 6 styles.

The boards are fitted with tongue and groove as standard, but on a number of references/boards it is also possible to opt for a floating placement with the UNIFIT X[®] system.

Learn about various options starting from page 50.

PREMIER 14H - Snow Rustic Nature

Snow

COLLECTION 02

Did you know that Cabbani parquet is produced in the same region as the famous wines Saint-Emilion, Puisseguin, Pomerol... a stone's throw from Cognac? Cabbani also guarantees 100% French quality.

RISTRETTO, ELITE & DESIGNER 10H - Terra Rustic Mix

Terra

COLLECTION 01

The French laying method is a nice but not very common method. It is about laying planks with different widths. Shelves of different colors can also be mixed. It is not about the technical, but purely about the aesthetic aspect. Parquet floors placed in the French way give the rooms a completely different perspective, large or small. You can download the calculation sheet on our website via this link www.cabbani.com/en/downloads.

Do you like this color but would prefer a floor with an oil finish?
Choose the color Maroon in Collection 02.

Chablis

COLLECTION 04

BATON-S 14P & RISTRETTO 14P - Chablis Rustic Mix

Did you know that the patterns Herringbone 'Baton' and Hungarian Point 'Chevron' are the two oldest installation methods for wooden flooring? Herringbone is the oldest and finds its roots in Europe, were they probably wanted to repeat the zigzag pattern of earlier architectural styles. Those floors became extremely popular in France under the name 'Bâtons Rompus' which literally means 'broken sticks'. The Hungarian point came into fashion later, during the 17th century. They think it came from Italy and is therefore a riddle why it is named 'Hungarian'. Both patterns are made from the same sized pieces of wood that are installed in a synchronized zigzag pattern. Herringbone boards are rectangular and fit simply with tongue and groove. Hungarian point is cut at an angle causing the boards to form a perfect point.

DESIGNER 14P - Merlot Aged

Merlot

COLLECTION 04

To make our wooden floor look really old, dents and scratches are made on the board and in the bevel. Thus, it looks as if the floors have stood the test of time. This process is done entirely by hand, so we can talk about hand aged floors. Within the Cabbani range you can only choose "aged" on birch plywood core in collections 2 and 4.

Natural

COLLECTION 02

The size of the space determines the size of the boards. For smaller spaces, it is best to choose narrow, short boards. In large spaces, broad, long boards come more into their own. The orientation of the boards also has an effect. Long boards installed along the length of a room make the room look even longer. Cabbani also has a nice range of pattern floors to give your room a superior appearance.

Do you like this color, but would you prefer a floor with a lacquer finish? Then choose the color European in Collection 01.

COLLECTION 04

The specific circumstances and applications are very important to determine the right choice of parquet. Will it be installed in a high traffic area? Will it be used with or without underfloor heating? Will it be laid in an apartment or a single-family residence? Your distributor or flooring professional will be happy to help you find the solution that meets your needs.

PREMIER 14H - Essence Rustic Light

Essence

COLLECTION 01

Fashion, beauty, food and interior. Currently all disciplines are fully involved and on the same wavelength. In all these areas we go for unprocessed, natural and pure.

According to trend watchers, one can perfectly explain why pure is a trend. After the excess of the 90s and early 21st century, we now choose for simple and sober. The planks are again recognized as real wood in its raw state.

With Essence, we respond to this demand and we give you a parquet with an appearance and touch of untreated wood.

Do you like this color, but would you prefer a floor with an oil finish?
Then choose the color Corn in Collection 02.

Malbec

COLLECTION 04

Like any wooden floor, Cabbani floors are also susceptible to scratches and dents. But it is precisely this lived-in aspect that provides authentic character. If you still prefer to avoid this, plenty of solutions are available: keeping the floor clean, a doormat, felt pads under furniture legs, protective mats under chairs with wheels...

If necessary, your parquet can also easily be repaired locally or freshened up using our specially developed maintenance products. Ask your dealer or installer for our maintenance kit for oil or lacquered floors. It's the perfect start for a well maintained beautiful floor.

CHEVRON-S 14P - Malbec Rustic Mix

DESIGNER 10H - Pure Rustic Mix

Pure

COLLECTION 02

For our "Scratched" look, band saw marks are made on the oak top layer of your floor combined with our brushed effect. These markings are perpendicular to the wood grain and are applied to the surface at random and in varied depths. That gives the wood a rustic, weathered look.

DESIGNER 10H - Pure Scratched

Silk

COLLECTION 01

Cabbani parquet is perfect for use in combination with underfloor heating, as long as the floor temperature does not rise above 27°C (80°F). Because there are different underfloor heating systems, we recommend following the manufacturer's instructions. Ask our distributors for more information. Specific laying instructions can also be found on www.cabbani.com/en/downloads.

Wood is a natural, humidity-sensitive material. Warping can sometimes occur under the influence of excess moisture or extremely dry air depending on the climate in your region or the conditions in your residence. To avoid possible problems, we recommend monitoring the air humidity using a hygrometer and maintaining the level with a humidifier or dehumidifier. More information about this is available on our website and in our installation instructions.

Shade

COLLECTION 02

Wood is a natural product. The differences in color and structure are part of it. This makes it beautiful and unique. There are different kinds and it gives the floor a certain appearance. Looking for a modern and stylish interior, choose for example a Select or Rustic Light grade that should not contain large knots. If you prefer a country style, choose a rustic floor with a Rustic Mix sort. Are you really looking for something unique, hard or sturdy, opt for a stylish interior with the Rustic Nature grade. The final appearance of the floor is also closely related to the choice of a varnish or an oil finish.

Smoked Walnut

SPECIALS

PREMIER 10H - Smoked Walnut Rustic Mix

The warm character of your wooden floor is closely connected with its maintenance. Indeed, maintaining wooden flooring not only keeps it clean, but also has a nourishing and protective function. We supply the necessary maintenance products that are specifically designed for our floors, whether varnished or oiled. More information about this is given on page 61.

BATON-S 10H - Smoked Walnut Rustic Mix

Don't get lost in the woods. Choosing wooden flooring takes time. Start by finding a Cabbani dealer so that you can experience our parquet. You should view actual boards, shades and colours in real life before making a purchase decision.

Showroom samples can give an example of the product's appearance but they may not be representative of the full range of colour, texture and grain variations which can occur in the product itself applying a reactive stain. As a result, a sample can only indicate a 1-m² reference of your new Cabbani floor.

Just as you take the time to choose the right parquet floor, Cabbani also needs its time to settle. Applying reactive stains causes a natural reaction of the ingredients present in the wood. After installing your new floor, the colour and grain patterns must continue to harmonize. The effect will vary and this is how that unique vintage look is obtained. Cabbani, it is pure craftsmanship, pure class.

Boreal

COLLECTION 04

We have all the necessary accessories to finish your Cabbani parquet perfectly. We have white pre-painted skirtings or beautiful veneer skirting's matching all of our design from our collection. Furthermore, 3-in-1 profiles are also available (end, adjustment and transitional profiles) as well as matching stair tread nosing. More information is given on pages 59-60.

ELITE 14H - Boreal Rustic Mix

INTELLIGENT ACCESSORIES FOR A PERFECT FINISH

PREMIER 10H - Umber Select

HOW TO FINISH YOUR FLOOR AND KEEP IT IN PERFECT SHAPE

1 VENEER SKIRTINGS

Cabbani skirting boards are available in 24 colours.
Skirting dimensions: 2150 x 80 x 12 mm (84.6" x 3.2" x 0.47")

2 PRE-PAINTED SKIRTINGS

Pre-painted skirtings with round edge on top, 69 mm high.

Dimensions: 2150 x 69 x 12 mm
(84.64" x 2.71" x 0.47")

3 PROFILES 1 profile, 3 applications

Profiles are intended to create an elegant transition or to take up height differences. Our useful profiles can be used for 3 applications: as an end profile, adjustment profile or transition profile.

Profile dimensions: 2150 x 47 x 11 mm (84.6" x 1.9" x 0.4")

4 TREAD NOSING

Cabbani parquet can also be used to finish stairs. We have developed solid tread nosing specifically for this application in all 24 colours from our product range.

Dimensions:
2400 x 60 x 10, 14 or 18.5mm options
 (94.5" x 2.4" x 3/8", 1/2" or 3/4" options)

5 SUBFLOORS

SILENT UNDERLAY (2 mm thick, 20m²/roll):

- This premium underlay guarantees a maximum sound absorption and offers a contact sound insulation improvement of at least 20 dB.
- Smooths out slight irregularities in the subfloor.
- Has an integrated moisture barrier. Also use our waterproof tape for perfect moisture protection.
- Suitable for radiant heating.

BASIC UNDERLAY (2 mm thick, 20m²/roll):

- This affordable and high-quality underlay guarantees a comfortable sound absorption and offers a contact sound insulation improvement of 19 dB.
- Smooths out slight irregularities in the subfloor.
- Has an integrated moisture barrier. Also use our waterproof tape for perfect moisture protection.
- Suitable for radiant heating.

WATERPROOF TAPE: It is vital to protect your wooden floor from rising moisture. We strongly recommend only using our own, thoroughly tested waterproof tape to affix Cabbani subfloors to each other. This is the only way to guarantee adequate protection against moisture.

KEEP YOUR FLOOR IN GOOD CONDITION

MAINTAINING FLOORS WITH OILED FINISH

The oil we apply to our floors contains natural pigments and oils that may only be treated with our Cabbani maintenance and cleaning products.

For daily maintenance and long-lasting protection of your oiled floor, it is best to use a soft broom or vacuum cleaner, followed by cleaning with 'Cabbani parquet soap'. To thoroughly refresh a dulled parquet and bring back its silky lustre, it is best to use 'Cabbani maintenance oil' in concentrated form.

If your floor looks dull due to trodden-in and caked-on dirt, 'Cabbani intensive cleaner' is the solution. This provides a deep cleaning that also removes some oil, which is why it is necessary to treat with 'Cabbani maintenance oil' in concentrated form afterward.

If you have underfloor heating, 'Cabbani maintenance oil' must be applied at least twice per year to nourish the wood adequately.

You can read our full maintenance instructions at www.cabbani.com/en/downloads.

MAINTAINING FLOORS WITH LACQUERED FINISH

It is important to avoid damaging the varnish when cleaning Cabbani floors with a varnish finish. That is why we recommend using our 'Cabbani cleaner'. This has been specially developed to remove dirt safely while protecting the wood.

'Cabbani cleaner' is available in concentrated version and must be diluted with water. To add an extra wear layer to your floor and to avoid or mask micro scratches we advise you to use our 'Cabbani Polish'. That extra protection makes your finish last longer and prevents adherence of dirt.
